

ROBTHINK ROBOTICS AND CODING SUMMER BREAK CAMP

This summer break, build creative robots, engage in robotic competitions, and bring robots to life using code! RoboThink offers academically oriented STEM programs focusing on robotics and coding for budding, intermediate and/or advanced students. Aligned with Next Gen Science standards, this program allows students to be hands on and engaged in problem solving formulation and solving it through design. Each day, our young engineers get a chance to build unique robots of all shapes, sizes and functions and learn how gears, motors, sensors, mainboards, and coding for robotics work through fun and exciting challenges! There are different curricula to adjust for different experience levels. No prior experience is required.
